James C. Underhill was curator of ichthyology at the Bell Museum of Natural History and coauthor, with Samuel Eddy, of the classic work *Northern Fishes*.

The book was required for my fisheries class, it's a good book. It defines Minnesota fish species to

Family extremely well, and has descriptive explanations of both genus and species.

Showed picture of new edition of the book but really was the old one. Will not be able to sell the book back to my college. Very disappointed in the blatant misleading.
