Customer Reviews

Helen Irlen is an internationally recognized educator, researcher, and scholar. The Irlen Method has been featured on 60 Minutes, Good Morning America, ABC Worldwide News with Peter Jennings, and news programs in many other countries.

Really has nothing to do with helping people with dyslexia.

Great read

Thank you

I am only half way through the book and love it! It explains so much to me! The overlays help my dyslexic 7yr old and I want to also get him tested. This book explains the theory behind it!

I should have taken the advice of other reviewers and skipped this book.

Wow! As an educator in the classroom for 45 years, I just found a new and wondrous treasure. I

want to know more about this research and applying it. It has helped me reach out and help a child who could not put together reading tasks in spite of knowing his sounds.

My daughter had been diagnosed with Irlen Syndrome and this is a great book to explain her reading problems. It is an interesting situation and one I believe affects many more people that don't know about this condition. This is a great book.

Although this was a quick and easy read, most of the info can be found on the internet. The best part of the book was the sample pages of what people w/ irlen syndrome see.
