Customer Reviews

Book by Retzer, Carol Ann

I appreciated that all of the lesson plans for K-6th grade are in one book. It helps to know how I should have explained letter shapes to my 1st grader, when she was first learning her letters. I flip back to the Kindergarten section all the time. My daughter basically traced letters, and writes most from the bottom, and uses lots of extra motions to get all of each letter written. I have also incorporated lots of the large muscle group teaching exercises from Kindergarten to help her focus on the SHAPE of the letter, besides just getting the letter to fit exactly on the lines, from top to bottom. Shaving cream as a medium for tracing letters on the table has been particularly successful at making re-learning how to write letters (top to bottom, left to right) fun for her.

I bought this for homeschooling thinking it would help with teaching handwriting. Don't have a clue what this is supposed to help with. I threw it out. Just get the teachers manual for A Reason For Handwriting instead. If your a homeschooler...don't be fooled by the title of this book.

Good program but in reality out explode the code teaches the same level of writing.
