Fast Facts For Stroke Care Nursing: An Expert Guide In A Nutshell (Fast Facts (Springer))

Synopsis

"[P]rovides a succinct yet comprehensive review of the evolution of stroke patient management. The text starts with a brief overview of the anatomy and physiology, tying it to the types of strokes, the assessment, and diagnostic tools. Acute measures and prevention of secondary injury are outlined and lead us to review the potential complications and finally the rehabilitation and patient/family education. Particularly helpful is the inclusion of the Brain Attack Coalition, The Joint Commission, and Centers for Medicare & Medicaid Services core measures.[The author] has done an excellent job of keeping this book appropriate for everyday use." --From the Foreword Linda Littlejohns, MSN, RN, FAAN, CNRN The best aspects of the book are that it is easy to read and factual, and it includes a wide range of information... I enjoyed the book. It is easy to read and navigate. Nurses will find it extremely helpful and valuable in the clinical setting. This is a good addition to a clinical library." Score: 98, 5 Stars.--Doody's Medical Reviews This highly practical, pocket-sized reference for stroke care nurses provides quick, bedside access to the most current guidelines for diagnostic tests, state-of-the-art treatments, and best-practice standards. This resource distills lengthy and often complex national stroke care guidelines into clear, bite-size pieces of information. It also explains the rationale behind stroke standards, making them easier to embrace and incorporate into practice. The book is organized consistently to foster rapid information retrieval. Each chapter includes objectives and such helpful features as "Fast Facts in a Nutshell," targeted segments that provide critical information at a glance. The guide also serves as an instructive resource for nurses not specializing in neurology but who are increasingly being called on to care for stroke patients. The book is also a helpful resource for stroke program coordinators and as a review for SCRNP and CNRN certification exams. Key Features: Reflects current standards of the American Heart Association, the American Stroke Association, and The Joint Commission Provides crucial information at a glance about diagnostic tests, state-of-the-art treatments, and best-practice standards Distills lengthy and complex national stroke care standards into clear, concise information Includes a comprehensive review of diagnostic studies Serves as a concise review for SCRNP and CNRN certification exams

Customer Reviews

Kathy J. Morrison, MSN, RN, CNRN, SCRN, FAHA, is a certified neuroscience nurse, a certified stroke nurse, a Fellow of the American Heart Association, and a recipient of the prestigious Pennsylvania State Nightingale Award for Clinical Nursing Excellence. As the stroke program manager for the Penn State Hershey Medical Center, she oversees all aspects of stroke care, from prehospital through stroke clinic follow-up. She played a pivotal role in Penn State Hershey Medical Center's attainment of The Joint Commission Comprehensive Stroke Center certification and has mentored many stroke program coordinators through the process of attaining Primary and Comprehensive Stroke Center certification. Ms. Morrison serves on The Joint Commission Expert Panel for Stroke Center certification standards. Ms. Morrison's published works have appeared in nursing journals and neuroscience course curricula. Her book, *Fast Facts for Stroke Care Nursing*, has been well received in the nursing community, both as a handy guide for stroke care nurses and as a preparation tool for the SCRN® certification exam. In addition to speaking nationally on stroke-related topics, she is active in community stroke screenings and awareness lectures and facilitates a regional stroke survivor support group. She established the Stroke Coordinators of Pennsylvania (SCoPA) in 2010—a group of stroke coordinators whose collaborative work has resulted in significant improvements in stroke care and outcomes in community hospitals across central Pennsylvania. She is a Fellow of the American Heart Association, a member of the American Heart Association Professional Education Committee and Hospital Accreditation Science Committee, a member of the American Association of Neuroscience Nurses Advocacy Committee, and a board member of the Susquehanna Valley Chapter of the American Association of Neuroscience Nurses.

Easy to read and understand. Well written. I bought this when I got a nurse job on a Neuro unit that mainly treats stroke patients. I had no prior experience or knowledge in taking care of stroke patients and this book really helped me to get familiar with the important and common things associated with strokes.

Amazingly helpful in prepping for stroke certification!!! Couldn't be happier. Well written, easy to read and retain. Hits all the key areas of the exam.

I am a SCRN! I read this book first before I did my other studying and I found that it covered most of the topics I saw on the exam and it explained them well. I highly recommend this book.

I'm studying for my SCRN and this is a great resource to start with. It covers basic anatomy and physiology, and basic information about stroke. I highly recommend this as a refresher prior to buying the Comprehensive Stroke Review book from AANN.

Have not finished it yet, but impressed with it so far. It is concise and easy to read. Seem's to be a good resource for nurses taking care of stroke patients. Also good for review when preparing for SCRN certification exam.

Awesome learning for students or established nurses going into stroke units.

This book is written in a way that you can remember key points especially if you are preparing for the SCRN. I have started reading it and I already know it is a great investment and will be in my reference library even after I do my exam. A friend of mine who just passed the SCRN said this book was the most helpful when studying for the exam.

Great book but too expensive!!!!
