Donald E. Wiger, PhD, is a practicing psychologist in St. Paul, Minnesota, specializing in conducting psychological evaluations for a variety of purposes. He has taught graduate courses in psychological assessment for over twenty years and has written several texts in the areas of

documentation, clinical forms, interviewing, outcomes, and crisis intervention. He conducts seminars nationally in areas such as documentation, interviewing, and private practice.

Perfect - and just what I was looking for. The writing clear and concise. The author handles the subject with ease. I've learned a lot from the book about documentation, diagnosis and treatment planning that I had not known before. I'm still reading the book but so far it has been a pleasure to read, professional and easy to understand.

This documentation primer is not complete. It contains some basics (writing up a mental status; not very good content) and then focuses primarily on writing treatment plans for managed care. In that sense, for people who may not have had experience writing such treatment plans (and treatment plan updates), the primer is excellent. It does not really address many other aspects of documentation. In this way, some of the claims on the cover appear to be somewhat overstated.

The psychotherapy documentation primer provided basic information to assist in diagnosing clients. They provided a blueprint, which has basic symptoms counselors needs to insure appropriate diagnoses.

The book breaks clinician knowledge down, the author gives his learning tools, and some pitfalls to be alert and stay away from. An update for DSM 5 is needed.

I'm studying for my second shot at the Florida LMHC exam. Knowing what is covered on it and where I fell short, this book is a must have. It covers subject matter I couldn't find else where. Most of what cost me on the first exam.

This was a great book to read. I would recommend having this book as it has great examples for documentation and how to complete various sections. I would have liked a little more regarding the index.

I think this is turning out to be a must have reference book for me as I am just graduating and just entering the field of Counseling. I like that the forms needed and the way to fill them out are clearly outlined in this primer! It has proved to be very informative for me.

This primer is very helpful. I shall refer to it frequently throughout my work. The materials presented will assist in writing better progress notes, treatment plans, and referrals.
