Grade Level: Preschool - 1

Customer Reviews

LAURA MARSH has worked in children's publishing for nearly twenty years as an editor, packager, and currently as an author. She has written numerous books in the National Geographic Kids Readers series, including Great Migrations, Sea Otters, Red Pandas, and Koalas.

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable &

pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

Bought a bunch in this series for my nephew who is eager to read and starting kindergarten this month. It's fun to read these together and talk about the topics as we go. More than once he has chimed in with a fact of his own he learned some were else. I love that these get him excited to read and learn in general.

All these are top notch - enjoyed by the kids who read them and parents love the facts they learn as well as improve their reading skills.

I bought literally 30 of these for my niece who loves them. They are such a quick read beautiful pictures she cannot put them down. She has all of them I hope they make more.

My students loved it

My son loves reading National Geographic's. I had this tucked away as a Christmas present along with others, but gave it to him because he was bored. Great pictures and facts.

My 5 year old daughter loves science and all things animals. We've ordered a few of these books when she asks questions on certain animals. The books are just challenging enough and very educational, explaining science at an age appropriate level. I wish I could find the sets complete.

Great
