Mini Weapons Of Mass Destruction: Build And Master Ninja Weapons

Synopsis

To become a ninja master, you need discipline, a silent footstep, and an impressive personal arsenal. Author and toy designer John Austin provides step-by-step instructions on how to turn everyday household and office items into 37 different ninja weapons for the modern era, including: the Crouching Tiger Catapult, Paper Clip Grappling Hook, Origami Boomerang, Magazine Nunchucks, Craft Stick Katana, Pencil Top Eraser Dart, and more! Once you've assembled an armory, the author provides several targets to practice your shooting skills—nested paper cups become a dragon; chopsticks and a paper plate form a tripod bulls-eye, and more. Armed, trained, and shrouded in black, you are now prepared for missions of reconnaissance and sabotage and other grim errands.

“Mini Weapons of Mass Destruction: Build and Master Ninja Weapons is another great instruction manual from John Austin. Whether folding a throwing star from a sheet of notebook paper or fashioning a blowgun and dart from the newspaper, you'll have hours of fun with this book.” —GeekDad

John Austin is a professional toy designer and author of MiniWeapons of Mass Destruction series, as well as So Now You're a Zombie. He lives in Cincinnati, Ohio.

My son has been a ninja every year for Halloween. Every. Single. Year. When I saw this book, I thought it would be a perfect gift for him. It arrived quickly and has tons of entertaining ideas for him to take his ninja warfare with his brother to the next level. Update: My lil' guy ended up making every single project in this book. He'd wake up early to make extra time for building a new ninja creation, then spend his after school hours leaping around the back porch with his new "weapon".

This has been an extremely helpful book to curb boredom at my work when we have our extremely slow days! Love it!

my son thought the projects in this book were a little easier to do than some of the others in the series, and used more found materials, rather than him making me a shopping list :)

Great book for older elementary kids!

My grandson loved this book.

Ok but in the end you can google all of these and find better builds. It is nice to have it all in one neat package though.

Was delivered quickly, everything was as described. Plus this is a really cool book especially if you have kids.

This purchase was a gift for my 10-year-old nephew. He and his younger brother so excited about it they ignored their other gifts. I was pleased they were excited about reading and engineering. Also, I love when I get to be the cool aunt.
