## Customer Reviews

Works like it's supposed to. I've seen some plastic ones but this one is all metal (like they should be). The bottom of the whistle, the part that adjusts pitch, is sheathed by a fancy rubber sheath that easily pulls out. For everyone complaining that their dog didn't stop barking, it's common sense that you use the whistle to TRAIN the dog to stop barking. There's nothing in their instincts that says "stop barking when you hear a whistle," and Ortiz, through the email you use to sign into , will provide some nifty training instructions.

Amazing response by my mini poodle who loves to bark even at shadows. I blow twice and follow with my own natural short whistle plus "Andi come". She comes running! . Doesn't work on my 12 yr nervous barker though. Only complaints is the material is hard to hold onto and it's so slim you have to hold it like a teacup. Otherwise it's good. I didn't figure out the differences in pitch because you can't hear them and there's no explanation on how to know.

Gets his attention....now I need to do the training. He is an energetic youngster and every person going by, toad, chipmunk, etc is worth a bark from him!

I am so glad that I ordered this whistle! It is made quite well and the lanyard that is included is great! My dog does not like this sound which is what we wanted! We have used it to train her to stop barking and stop using her teeth! Thank you for this great whistle! I might be ordering another one at a later date so we can have two on hand!

The only thing that my dog does is run to me when I blow the whistle...I had tried it when barking and all we do is end up with a converting.

Excellent transaction. Highly recommend. A++++

As expected! It worked with our dog! As soon as he sees the whistle he sits (that's what we have taught him so far). Seller makes sure you are happy with product. Thanks a lot!

Works well. Still experimenting with it to get to correct frequency to curtail the barking dogs behind us
