# Laboratory Manual To Accompany Earth Science

## **Synopsis**

Renowned authors Edward Tarbuck and Frederick Lutgens invite students on a journey of observation, explanation, and participation in the study of Earth's processes. An accessible writing style, original artwork by Dennis Tasa, and powerful technology create a fresh new program that leads your diverse classroom on a path to discovery. This new edition is perfectly suited to today's high school curriculum. Bringing content to life, the integrated GEOF Key Concepts CD-ROM connects students to the world through video, animations, and assessment.

## **Book Information**

Paperback

Publisher: PRENTICE HALL; Lab Manual edition (July 6, 2004)

Language: English

ISBN-10: 0131258982

ISBN-13: 978-0131258983

Product Dimensions: 8.3 x 0.4 x 10.9 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 5 customer reviews

Best Sellers Rank: #245,589 in Books (See Top 100 in Books) #52 in Books > Teens > Education & Reference > Science & Technology > Earth Science #632 in Books > Textbooks > Education > Secondary Education #22219 in Books > Education & Teaching

## **Customer Reviews**

Because it was impossible to look inside the book at time of order, this proved not to be what I expected from it when I ordered. Geological phenomena and processes are treated superficially. In my opinion the book seems to be oversimplified. There are not references. Compared with "The Practical Geologist" paper quality is poor and the price is higher. However the book is useful rather to the advanced students in geology to verify knowledge.

Great and complex. Not just run-of-the-mill labs.

Not what I really expected. Too much writing and gobble-de-goop to be really interesting.

as expected

This text book was a great price compared to the new publisher price. It arrived in great condition and helped us save money.
