Sam Loyd's Cyclopedia Of 5000 Puzzles Tricks And Conundrums With Answers

Synopsis

Sam Loyd (1841-1911) was the all time greatest inventor and developer of puzzles. He is described by Martin Gardner, the author of the "Mathematical Games" column in Scientific American, as "America's greatest puzzlist and an authentic American genius". His fame is world wide and books of his puzzles have been published in Russian and many other languages. This book, Sam Loyd's Cyclopedia of 5,000 Puzzles Tricks & Conundrums with Answers, was compiled by his son and published in 1914 after his death. Although many books have been written about some of Loyd's puzzles, this remains the most complete volume of all of his puzzles. This is considered to be the most fabulous and exciting collection of puzzles ever assembled in one volume. The puzzles come with wonderful illustrations.

Customer Reviews

If you're into puzzles in general then you do know Sam LOYD. If you don't, then just pretend that you do because you have already met with several of his creations, I'm absolutely positive about that. The book is big, 5000 is some number (!!!), the puzzles are classics, they are creatively crafted and presented, and the illustrations do have that lovely vintage style. In 5000 puzzles you have all the variety and difficulty range that you can imagine and expect, the style remains unique and very (falsely?) entertaining, and I didn't count the puzzles that kept me thinking for days. If you're still not convinced, well for the price buy it anyway because even if for some odd reason you are not happy

with your acquisition, your bookcase will be, for sure !This book has so much value (even if it's "only" historical) that I will end up making a hardcover for it, I know it. That means also that its actual paperback cover doesn't make it justice

Very like puzzle books and this one is the best! The puzzles are very old, but very good! Quality of content is great.

A classical puzzle collection. Really love it.
