Liberation Ecologies

Synopsis

At the beginning of the 21st century, the environment and the future of development continue to be issues of crucial importance. Most explanations of environmental crisis emphasize the role of population growth, thus focusing their attention on the poor. By comparison, *Liberation Ecologies* elaborates a political-economic explanation drawing from the most recent advances in social theory. The new edition has been extensively revised to reflect recent changes in debates over the real definitions of 'development' and 'environment', and contains nine completely new chapters.

Customer Reviews

Michael Watts is Director of the Institute of International Studies, University of California at Berkeley.

Richard Peet is Professor of Geography, Clark University, Massachusetts.

A good text on ecology confined within the frame of Anthropology.

This book has helped me analyze social and ecological issues in a whole new way. I am forever changed because of the complexities brought out by the *Liberation Ecologies* authors. For anyone in the social sciences but with an interest in ecology or the environment, this is a must read.
