# Mastering Endothelial Keratoplasty: DSAEK, DMEK, E-DMEK, PDEK, Air Pump-assisted PDEK And Others, Volume I

## Synopsis

Volume 1 of this edited book covers basics of endothelial keratoplasty and various surgical techniques currently in use. Chapters on DSAEK, DMEK, big bubble, air pump-assisted and endoilluminator assisted DMEK/PDEK, pre-Descemet's endothelial keratoplasty (PDEK), and Descemet's membrane endothelial transfer (DMET) complete the topics on various surgical procedures. Complex situations and complications have been covered in volume 2 of Mastering Endothelial Keratoplasty. Endothelial keratoplasty is a field of great interest to all corneal surgeons. It is an exciting and evolving field in corneal transplantation as the newer techniques of DSAEK, DMEK, E-DMEK and PDEK have inherent advantages that make them supersede the older techniques by far. Hence, in today's scenario with the clearly superior results that these techniques offer, it is imperative for all corneal surgeons to learn them and know everything about managing the patient from the pre-operative to the postoperative period. This two-volume book is a must-read for the beginner as well as the established ophthalmologist with interest in corneal transplantation. It is also a must-have for educational institutions, hospital-based libraries and for post-graduate students, fellows and residents who want to expand their knowledge.

## Book Information

Hardcover: 251 pages

Publisher: Springer; 1st ed. 2016 edition (August 9, 2016)

Language: English

ISBN-10: 8132228162

ISBN-13: 978-8132228165

Product Dimensions: 6.3 x 0.8 x 9.6 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)
