Emergency First Aid: Recognition And Response To Medical Emergencies (Pocket Tutor Series)

Synopsis

Emergency First Aid is a reference guide on how to recognize and respond to common medical emergencies. It will allow the user to check for vital signs and assess the severity of medical emergencies and when to call for help, how to care for victims until medical help arrives, or what to do if a situation requires immediate response (e.g., choking, emergency childbirth). In an emergency, it will quickly and simply instruct you of what you can do to help. This guide is an excellent source of portable information

Customer Reviews

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

This is a fully laminated large fold out that will be weatherproof and will tuck away nicely just about anywhere. There is plenty of good information such as choking, childbirth, CPR, and basic

contusions and broken bones. Also contains basic information about rescue hazards, and the fundamentals of first aid behavior. This is an excellent guide to keep close by (mine is in my bug out bag) as a quick reference guide to refer to in those times you may in an intense situation and need that little reminder of your first aid priorities.

Basic information to have on hand if in a situation where stress has your mind drawing a blank. Don't laugh....it happens.

Just wanted a basic first aid reference that was waterproof for my bug-out-bag. I've taken courses of first response to medical emergencies, but thought this would be a wise addition just in case. Don't expect anything incredibly detailed, but this has about everything necessary for what you could expect out on your own.

a good review for everyone. straight forward information that gets you the answers you need in a first aid required incident

Great product, put this in my hunting pack. folds up nice and neat and because its laminated it should last a very long time.

k

Lightweight, good construction and easy to read. A must have for everyday use

Contains a great amount of quite useful basic information. A bit of stuff I won't need on the trail and in the backcountry, but these pamphlets are more all-around and they do it well.
