STRENGTHS: THE NEXT GENERATION Q&A with author Tom Rath (From the Gallup

Management Journal; interviewed by Jennifer Robison) Last month, StrengthsFinder 2.0 hit the

bookstores. Book browsers, no doubt, had many questions, and among them was probably "Didn't I already read a book about this?" Well, actually, yes. But the topic was worth revisiting for two reasons. In the six years since the release of *Now, Discover Your Strengths*, more than 2 million people have taken the Clifton StrengthsFinder assessment, which means billions of people have not yet had the opportunity. The second reason is that Gallup researchers just haven't been able to let the topic rest. Over the past decade, they've done more surveys, more interviews, and more studies; they've prodded and poked and analyzed. And they realized that there's a lot more to understanding human talent than most people know. Those who are familiar with the StrengthsFinder assessment know that it is designed to uncover certain key talents -- patterns of thought, feeling, and behavior that can be productively applied. These patterns are categorized into 34 broad themes -- such as Achiever, Ideation, and Relator -- and those themes indicate and predict one's innate and unique talents. Those talents, when multiplied by the investment of time spent practicing, developing skills, and building knowledge, can become strengths. Some of this is just common sense; it seems intuitive that your performance will be better if you're doing what you naturally do well. But some of it seems counterintuitive and runs directly against conventional wisdom: No amount of training will help you excel in your areas of weakness. You can't do anything you want to do -- or be anything you want to be -- because you're just not going to be good at everything. But if you work with your talents, you can be extraordinary. StrengthsFinder has resonated with the business community because there's a direct link between talent development and performance. In this interview, Tom Rath, author of StrengthsFinder 2.0, discusses what Gallup scientists have learned since the publication of the first book, what more there is to discover about your talents, and why it's bad to focus on your employees' weaknesses, but simply cruel to ignore them completely. GMJ: Why the new book? Tom Rath: StrengthsFinder 2.0 is an effort to get the core message and language out to a much broader audience. We had no idea how well received the first strengths book would be by general readers -- it was oriented more toward managers -- or that the energy and excitement would continue to grow. More than two million people have taken the StrengthsFinder assessment, and each month, the number of people learning about their talents goes up. But readers keep asking us: "Now that I know about my strengths, what do I do next?" So we went back and surveyed hundreds of them and asked them how they apply their talents. Then we whittled their suggestions down to the ten best ideas for each theme. We also added more than five thousand Strengths Insights to version 2.0 that allow us to offer more individualized theme descriptions than we could before. So, instead of general descriptions of your top five talent themes, in 2.0, you get a talent profile so unique that you're unlikely to share even a sentence with someone

else. And as I said, the first book was really written for a business audience. People have had trouble retrofitting the theme descriptions if they are in non-management roles, but they've tried. This book helps readers apply strengths theory to any type of role and gives them ideas to help them apply their talents in their daily life. GMJ: It's been six years since the first book was published, and Gallup has done hundreds of thousands more interviews. Have you discovered anything new about talents and strengths? Rath: No, but we've seen more and more evidence that demonstrates that focusing on your talents is important. We did a survey in 2004 that examined what happens when your manager ignores you, focuses on your strengths, or focuses on your weaknesses. We found that if your manager focuses on your strengths, your chances of being actively disengaged go down to one in one hundred. However, if your manager primarily focuses on your weaknesses, your chances of being actively disengaged are 22%, and if your manager ignores you, that percentage rises to 40%. GMJ: Why such a high rate of disengagement among those who are ignored? Rath: It basically mirrors the psychology of raising kids -- being completely ignored is the worst possible psychological state. You would actually feel better if your manager went from ignoring you to focusing on what you do wrong all the time, because then at least she's paying attention to you. GMJ: Did your new research turn up anything that surprised you? Rath: We've talked a lot about how strengths can help you be more of who you are, and you get more out of your best players, and all of that. But in the last ten years, we've also found that it's a good strategy just to wipe out the extreme negativity in the workplace. I get this question almost every time I talk to a group: "What do I do about that one person who just drags everyone down every day?" My glib answer was to get rid of the person. I always thought there were some people who were just destined to be disengaged in their jobs because that was their personality, and no matter how hard managers tried, there wasn't much they could do with some of those people. But the data from the last five years would suggest that much of that epidemic of disengagement is fixable. More than I ever would have guessed, it helps tremendously if a manager starts by focusing on someone's strengths. You may not take someone who's actively disengaged and make him into your most engaged employee, but it will help get him out of that mindset where he's scaring off colleagues and customers. GMJ: So is that the business case to be made for putting people in roles that play to their strengths? Rath: I think it's the secondary business case. The main business case is that people have a lot more fun and get a lot more done if they're able to spend time in areas where they have some natural talent. I think that's a fundamental principle that hasn't changed much at all. The one thing that we were clear about in StrengthsFinder 2.0 is that the American dream ideal that "You can be anything you want if you just try hard enough" is

detrimental. This is especially true when people buy into it hook, line, and sinker. You may not be able to be anything you want to be, but you can be a lot more of who you already are. [Taking] StrengthsFinder is just a starting point; it's step one of a hundred in figuring out the areas where you have the most potential for growth. GMJ: What is the most challenging aspect of your ongoing strengths research? Rath: While hundreds of people in our organization continue to research this topic each year, our greatest challenge might be incorporating the new research while making the message even more succinct and applicable to a wider audience. So while we have hundreds of new case studies and meta-analyses about strengths -- and about employee engagement and business outcomes -- we tried to stay as close as we could to the basics. GMJ: The Clifton StrengthsFinder assessment has always categorized talents into thirty-four themes. Have you ever considered adding or subtracting any, or refining them further? Rath: Yes, we looked at that extensively as we started to review our plan for the updated version of the assessment. We found that so far, the thirty-four themes have done a good job of describing much of what we've learned since releasing the first version of the assessment. If enough people had made a case about a specific theme that didn't exist, we were open to adding that theme. I think we probably will continue to investigate whether there are themes that emerge that we haven't yet picked up on. But there wasn't a real strong case for any additions at this time. GMJ: What would you most like to accomplish with StrengthsFinder 2.0? Rath: Our big goal and mission as a company is to help people do more of what they do well. We've topped two million completed StrengthsFinder assessments, and it's not too hard to imagine that number getting to twenty million soon. An organization that exists to help people has a responsibility to get better and better. By reaching beyond our initial audience, we help people get the latest and greatest research. But we also hope it helps people live better lives.

ABOUT STRENGTHSFINDER In 1998, the Father of Strengths Psychology, Donald O. Clifton, Ph.D. (1924-2003), along with Tom Rath and a team of scientists at The Gallup Organization, created the online StrengthsFinder assessment. In 2001, they included the first edition of StrengthsFinder with the bestseller *Now, Discover Your Strengths*. In 2004, the assessment's name was formally changed to "Clifton StrengthsFinder" in honor of its chief designer. In 2007, building on the initial assessment and language from StrengthsFinder 1.0, Rath and Gallup scientists released a new edition of the assessment, program, and website, dubbed "StrengthsFinder 2.0." Rooted in more than 40 years of research, this assessment has helped millions discover and develop their natural talents.

Here's what you need to know about StrengthsFinder 2.0:- Buy the book new. Each copy includes a scratch off passcode that gives you access to the StrengthsFinder 2.0 test. It can only be used once and the book is a waste without the test.- The book itself is largely a description of the strengths measured by the test. It's a companion to the test and not something you would read on its own, but it does a great job of bringing the test to life.- The test is worth the price of admission. It's 177 rapid-fire questions that reveal the top five themes, or strengths associated with your personality. Knowing these strengths is critical, because they are unchangeable traits that will enable you to succeed to your fullest potential.- I also purchased the recommended "Emotional Intelligence 2.0". I enjoyed it immensely as well.

The intelligence that this book provided me on my working style was stellar. Highly recommended, this is also a great tool for people prepping for interviews.

First of all, most of the negative reviews I see seem to misunderstand the point of the test. It is absolutely NOT a personality test. It is a strengths test. Secondly, I have found the information to be extremely helpful. Adding this to the org charts in my organization has been great. Buy this book.

Great read, does a good job of helping you find your strengths. I find that I am chuckling at myself daily recognizing my strengths and how they mold my actions.

This is very valuable. It gives everyone a head start in learning to work together. I take the results of everyone's test, put them into a spreadsheet and distribute it to the whole team so we can all see each other's strengths. It helps me as a leader, when I ponder on projects or client needs. I constantly use the information gained here - to make business decisions! I also had my teenagers take the online version for kids and it's helped me make better discipline and educational decisions for my family. I also use this as a giveaway when I do seminars or lectures - fun topic and original door prize! WELL worth the price!!!

I purchased this book for work and had low expectations going in - don't I already know what I'm good at? And if so, aren't I done thinking about those things? This book's approach was very easy to follow. The forward lays everything out and explains the why, and after the online assessment you receive a personalized document (mine was 19 pages!) of tips specific to your arrangement of top 5

strengths.

Thank you!

This is a fun test to see what your strengths are. Some of them I already guessed, but it was educational to delve deeper into understanding what steps I can take to enhance my strengths. I am curious to know the rank of my entire list is, but was only given the top 5. I believe you can pay \$75 to receive the entire list of 36 in order.
