Customer Reviews

well once again i have everybook in this series and find them so so helpful beautiful music for students to learn from and the book itself is laid out well...not at all boring or a jumble of scales together but the student also learns all they need and can advance with the series..

My daughter is in her 2nd year learning the clarinet and this book is very helpful.

I love this series of books (except for the duet and solos ones). They are well-paced, thorough, and tuneful. I use them instead of the more traditional (and boring) Rubank books, and I have not noted any deficiencies in my students' technique. Alternatively, they are also good for sight-reading, which is what I use the Tunes for Technique volume for. Highly recommend.

Exactly what my daughter needed for private lessons

This book is the one I had to buy for my clarinet class. I was cheaper on than buying local.

I was impressed with this company. It looked brand new no pencil nothing of old time, and it shipped faster than everything else I had bought. I would buy from them again.
