He is the founder of Australia-based Family Health Network, parent of CalorieKing Wellness Solutions, Inc. Mr. Borushek has authored and published several books on weight control, heart disease prevention and diabetes. Mr. Borushek is best known for his 'Top 100' annual best-seller, CalorieKing's Pocket Calorie, Fat & Carbohydrate Counter, which has sold more than 15 million copies.

I bought the book first because of health issues I need to keep track of certain nutrition counts, and I liked the size of the book - I can take it with me easily. It gives me all the information that I'm looking for right now. It takes sometime to figure out where to look up items, but it gets easier as I've used it. I am pleased with my purchase, it was what I was looking for.

This is a great book, full of helpful information!

This is an excellent book. It has pretty much every and any modern product I could think of. And that also includes Fast food places as well as restaurant food. If you don't know this is a smartphone app as well so you can get the app too if you prefer.

one of the best books to get your fats, calorie and carb counts. nice section in the back for fast foods and they carry enough information on items hard to find in other books. Well researched and have purchased this book thru the years. I keep updating my books as they add more information all

the time. Great size to carry and easy format to find what your looking for. This has be repurchased by me several times.

Best book I have found to figure out the carbs. Used by my dietician at the hospital where I took my diabetic class.

This book is a must for people who are diabetics and counting carbs. Further, great for people watching their sodium and/or fat consumption, people who just want to know what they are eating, people who want to make healthy decisions in their eating habits. This book contains the breakdown of national chains, like McDonald's or Burger King. It's all there in a pocket size (larger pocket), book that is easily carried. It tells you the calories of the main offerings of fast or regular food eateries. Regular and/or brands of food. It even has an Ethnic eating breakdown! If you want to count your calories that is also listed with its own column, with amounts of sodium, carbohydrates, and fats in columns next to it. It has opened my eyes to the carbs in food. The Ethnic eating section has been a big help as well. I highly recommend this book to everyone! The amount of information and the easy to see columns next to the food listed is helpful.

The 'go to' reference for insulin dosing for insulin:carb ratios. Nice to have the little one in my purse, and large print for at home (I'm homebound most of the time, so appreciate the larger print edition).

This is a great book. It has almost anything you are looking for in it. It is arranged in categories so you can find things quickly. I really love the restaurant section. It helps in making the decision of what to order when dining out a lot easier. I think pretty much everyone can find something in this book useful. I might order another one just to keep one in the car for traveling. Don't just get yourself one. Get one for a family member, a neighbor or a friend. They will be able to use it too!
