# Glass Chemistry

## Synopsis

Glass Chemistry is concerned with the relation of chemical composition, structure and properties of various glasses. The book has been translated from the third German edition, which serves as a textbook for university students in materials sciences and a reference book for scientists and engineers in glass science and production. The central themes of the book are the chemistry and physics of glass. Detailed knowledge of the compositional and structural facts is the basis for the systematic development of new glasses as construction and optical materials. Glass Chemistry is an interdisciplinary book on the borderlines between chemistry, physics, mineralogy and even biology and medicine. The book represents a well balanced treatment for students, scientists and engineers.

## Book Information

Paperback: 464 pages

Publisher: Springer; 2nd ed. 1994. Softcover reprint of the original 2nd ed. 1994 edition (November 22, 2011)

Language: English

ISBN-10: 3642787258

ISBN-13: 978-3642787256

Product Dimensions: 6.1 x 1.1 x 9.2 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)
