Sheet Metal Fabrication Basics (Biker Basics)

Synopsis

Sheet Metal Fabrication Basics is designed to provide how-to help for fabricators working at home and in small shops. Whether the goal is a hand-made air dam or a one-off air cleaner cover, the project can be done without expensive power tools. With help from fabricators like Rob Roehl, tin-man for bike-builders Donnie Smith, the book documents the creation of numerous simple shapes, made mostly with hammer and dolly, hand-operated shrinker-stretcher, and various mallets. Some objects are made from more than one piece, thus the book also includes a section on welding both aluminum and steel.

Best known for motorcycle titles like *How to Build a Chopper* and *How to Build a Cheap Chopper*, how-to-author Tim Remus is also the author of custom painting books like *Advanced Airbrush Art* and fabrication titles like *Ultimate Sheet Metal Fabrication*. Today the former auto mechanic runs a small publishing company, Wolfgang Publications, located in Stillwater, Minnesota. Some of his personal projects include a recently finished 250-tire Softail and an old Henry J hot rod he says may never be finished.

i've bought a lot of sheet metal fab books on , and this is one that really is for the backyard fabricator. expensive machinery is next to nil in this book and instead focuses on very gradual

basics of moving sheet metal with most tools you can easily afford or fabricate yourself. bought the jesse james austin speed shop dvds on , and although they're affordable and interesting to watch if you were a west coast choppers fan, they cannot hold a candle to this book as far as educational value. i only wish that rob roehl (pictured on the cover) would release fabrication videos, maybe showing how to even set up basic fixtures at home and how they could potentially shape custom parts at home. long story short, you can't go wrong buying this one.

Great Great book. Easy to read and understand.
