The Rule Of Nobody: Saving America From Dead Laws And Broken Government

Synopsis

The secret to good government is a question no one in Washington is asking:

“What’s the right thing to do?” • What’s wrong in Washington is deeper than you think. Yes, there’s gridlock, polarization, and self-dealing. But hidden underneath is something bigger and more destructive. It’s a broken governing system. From that comes wasteful government, rising debt, failing schools, expensive health care, and economic hardship. Rules have replaced leadership in America. Bureaucracy, regulation, and outmoded law tie our hands and confine policy choices. Nobody asks, “What’s the right thing to do here?” • Instead, they wonder, “What does the rule book say?” • There’s a fatal flaw in America’s governing system – trying to decree correctness through rigid laws will never work. Public paralysis is the inevitable result of the steady accretion of detailed rules. America is now run by dead people – by political leaders from the past who enacted mandatory programs that churn ahead regardless of waste, irrelevance, or new priorities. America needs to radically simplify its operating system and give people – officials and citizens alike – the freedom to be practical. Rules can’t accomplish our goals. Only humans can get things done. In *The Rule of Nobody* Philip K. Howard argues for a return to the framers’ vision of public law – setting goals and boundaries, not dictating daily choices. This incendiary book explains how America went wrong and offers a guide for how to liberate human ingenuity to meet the challenges of this century.

Customer Reviews

“Philip Howard has been on a lonely crusade for common sense, good government, and other quixotic ideas. He’s done it again with *The Rule of Nobody*, an utterly compelling and persuasive book that, if followed, could change the way America works or doesn’t work.” - Fareed Zakaria, author of *The Post-American World* “It’s so damn hard to fix things when people can’t or won’t make new choices. This powerful book shows how Washington is sinking in legal quicksand, literally beyond the power of those supposedly in charge. Perhaps the only solution, as Howard argues, is to prune out these obsolete laws and chop away on the bureaucracy so that citizens of common sense can roll up their sleeves and get to work again as America has always done. Today, leadership is practically illegal.” - Alan K. Simpson, U.S. senator, Wyo.

(retired) “Philip K Howard has always struck me as an eminently reasonable, articulate advocate for common sense solutions. No wonder no one listens to him.” - Jon Stewart, *The Daily Show* “Philip Howard offers a startlingly fresh slant on what is holding America back. No one is free to make choices, including, especially, government officials. Regulatory law has become a nearly impenetrable web of detailed prohibitions and specifications. Everyone is hamstrung. Dense regulation discourages individuals, communities, and companies from taking new initiatives. It also prevents government officials from making the case-by-case judgment needed for effective regulatory oversight. This is an important reason why it is so expensive to start a business, why healthcare costs have gone through the roof, and why innovation has slowed to a crawl.” - Professor Edmund S. Phelps, 2006 Nobel Prize in Economics and director, Center on Capitalism and Society “You’ll laugh and wince and cry at the ridiculous situation America has gotten itself into. Howard shows us how we manufactured the rope we are now hanging ourselves with. Then he shows us how to untie the noose and put America back on the path to trust, competence, and greatness.” - Jonathan Haidt, author of *The Righteous Mind* “This book is so deep, appealing, and rousing that it has the potential to actually move politics out of its current stasis.” - Christopher DeMuth, Distinguished Fellow, The Hudson Institute “Amid the liberal-conservative ideological clash that paralyzes our government, it’s always refreshing to encounter the views of Philip K. Howard, whose ideology is common sense spiked with a sense of urgency.” [This] book drives home some large truths.” - Stuart Taylor Jr., *The Wall Street Journal* “Compelling.” - Nick Gillespie, *The Wall Street Journal* “Howard’s proposed fix is witty, and intriguing: a follow-up to the Bill of Rights called the Bill of Responsibilities. These would be five new Constitutional amendments aimed at making government work better.” - Kyle Smith, *New*

York Post – “Philip K. Howard’s important new book helps to explain why government at all levels not only is on autopilot but on a flight path that can only end in disaster. The Rule of Nobody – Envisions a shift in values away from automatic government and toward a structure that allows humans to make choices needed to adapt to local need and global challenges. Well, here’s hoping. – Nick Gillespie, The Daily Beast – “A convincing, provocative argument Howard’s clear, levelheaded descriptions of how things are done elsewhere proves his point: We really need to figure out a better way to operate, lest the country grind to a halt. – Jesse Singal, Boston Globe – “Rather than asking what’s right to do, Howard contends, government asks what the rulebook says to do. As a result, waste occurs, debt rises, schools fail, health-care costs soar, the economy falters and even problems that seem simple and easy to solve become bureaucratic nightmares. – Alan Wallace, Pittsburgh Tribune-Review

Philip K. Howard, the author of the New York Times bestseller *The Death of Common Sense*, is the chair of Common Good. He lives in New York City.

A good analysis of what has grown up around us - fields full of weeds (of rules and regulations). An example: our little city of 35K is looking to put 14 pages of ordinances in place to govern how local churches can "minister" to the homeless in our community. When can they feed them, where can they feed them, how many days in a row can they be housed or fed in one location (in a freaking church for crying out loud). There are already program guidelines in place that go farther than constitutionally allowed, were they to be put into municipal code, but, because some individual on the council is "concerned" about what "might" happen in the future they want to put bubble-wrap around it now to ensure nothing happens in that uncertain future. Oh, and let's not forget about the staffers (policy wonks) who went to school for this very thing, who need to justify their jobs, so give them a code to write and off they go, mindless as an amoeba replicating itself, writing code without thinking of the unintended consequence. BECAUSE, they have been educated in universities that no longer teach ethics, but rather relativism. No absolutes, no hitching post. Like migrating geese - they wake up in a new world every day. When you ask them about virtue and ethical reason they give you that "duck looking at thunder" look. Great book, highly improbable we could ever meet the challenge. Sad!

Excellent book. Gives real life events that cost US tax payers tens of millions of dollars just because

of out dated laws and no one in authority with the power to change them or make the final decision. Their are examples of good politicians (all parties), lawyers, public employees, unions and more that are saddled with outdated laws so they can not make good public policy or act in the good for the general population. There are a few examples where because of these outdated laws individuals can slowdown, stop or use these laws to better their common interest. I bought this book because Time magazine had an article on Jeb Bush and it suggested to understand some of his thinking to move this country forward, you should read one of his favorite authors, Philip Howard and "The Rule Of Nobody". If you like history and what to see why things for schools to public works projects don't get done in a cost effective manner and what to have well thought out ideas on how we can start fixing these issues, I highly recommend this book. Favorite quote "No act of government is morally valid unless it can be justified as being in the common interest."

In writing my book "Rule of Law: Why and How We Must Amend the Constitution" there were many instances where I felt the urge to give detailed examples of why a particular issue was a real problem that needed to be solved. In the end I chose to focus more on the solutions. I wish I could merge "The Rule of Nobody" with my book because it vividly describes the disaster that is the bureaucratic state and gives a stronger impetus for reform. Some have complained that this book is too repetitive or is too much of a rant but the numerous examples given are well-researched and are necessary to make a powerful case for reform. Howard has a different world view than me. I think his analysis is slightly off kilter in some respects and I am skeptical of some of his proposed solutions but this book is a valuable guide for understanding how government's laws are smothering our people. This book is an objective and fair critique of how chaotic and dangerous our legal system is. Howard also deserves praise for calling attention to the fact that amending the Constitution is the best hope of restoring sanity to government. This book is one more proof of the growing sentiment in America that deep structural reforms are necessary to fix government. Regurgitating new (but really the same) politicians will not suffice.

I read The Death of Common Sense a few years ago and it became one of my 10 seminal books in understanding how the legal system in the US works and needs urgent reform. The Rule of Nobody is just as good. It lays out in easily readable prose how the US legal, political and regulatory system has evolved over the years and what the consequences are if US citizens do not get involved in reforming it. In this book Mr Howard also describes the solution. I highly recommend this book.

A thorough description of the faults of a bureaucracy where officials write such convoluted regulations that they actually make just about every situation they govern worse. And many do nothing government workers find it much easier to say no to any request since then it doesn't require them to try anything close to customer service. While he doesn't state this specifically I came away with a simple between the lines idea. "If a bureaucrat doesn't have the authority to give final approval to a request and grant any waivers that might be required, they shouldn't have the authority to say no".

Mr. Howard again present extremely poignant facts and viewpoints. This book should be read by every American.

Nicely details why government frequently does not work--and the solution is not to remove discretion from public officials, but to enable public officials to use good judgment.

Nobody on the political scene talks about the problems that Mr Howard sees. Nobody wants to mention the secret that both the left and right depend on to avoid making the right decisions. A great and fun read that did make me a little sad because the fix is obvious, but tough. Please buy this book and tell all your friends!!
