## Synopsis

The large majority of chess players who would like to improve their game, have not the necessary opportunity of pitting themselves against players of master-strength, or at least of obtaining the desired instruction from personal intercourse with them. It is for such players that the present work is intended. The books on which the learner has to rely hardly ever serve his purpose, being mostly little more than a disjointed tabulation of numberless opening variations, which cannot be understood without preliminary studies, and consequently only make for confusion. In the end the connection between the various lines of play may become clear, after the student has made an exhaustive study of the subject, but very few would have either the time or the inclination for such prolonged labour.
